

- 1) Why did you decide to choose medicine as your specialty?
- 2) When have you become interested in medicine?
- 3) Who is your scientific supervisor and what is his/her contribution to science?
- 4) What problem do you investigate?
- 5) What can you say about your scientific work?
- 6) What conclusions will you make if the results of your research are positive/negative?
- 7) In what field of medicine may the results of your research work be applied?
- 8) Have you carried out any experiments in the field of your interest?
- 9) Are there any difficulties in carrying out your research?
- 10) How do you plan your research?
- 11) What have you already managed to do?
- 12) What methods are you going to use in your investigation?
- 13) What methods of material analysis do you use?
- 14) What kind of sources do you prefer to use for the theoretical grounds of the research?
- 15) Who are the best informed scientists in the field of your research?
- 16) Is the subject of your research topical at the moment? Why?
- 17) What contribution may your research make into science?
- 18) What will your scientific research give the world?
- 19) In what way can your investigation be useful to Medicine?
- 20) Could you speak about the historical background of your problem?
- 21) How will you continue your investigation?
- 22) Did you take part in scientific conferences?
- 23) Did you make any reports? What were they devoted to?
- 24) Are you going to take part in scientific conferences in the future?
- 25) Have you got any publications?
